

A green roof or living roof, is a roof of a building, house or structure that is completely or partially covered with vegetation and a growing medium, planted over a waterproofing material. Filtrexx® Green Roofs are multi-functional roofing systems designed to mitigate the impact of urban development by managing storm water, reducing building heat absorption, and creating valuable green space.

ADVANTAGES

- Reduce storm water quantity
- Reduce energy costs
- Provide wildlife habitat
- Mitigate heat island effect
- Contribute to LEED credit accrual

APPLICATION

- Stormwater management
- Pollutant removal
- Thermal insulation for buildings
- Urban green space
