

Our sandbags and gravel bags are manufactured with orange, light yellow, or white polystyrene strands. Strands have a typical thickness of 850 denier (weight for measuring the fineness of threads). Strand weave is typically 10x10 per square inch. Bags include zip ties or draw strings. Polystyrene strands are treated with UV inhibitors to accommodate up to 2,000 hours of UV protection.

PRODUCT SPECIFICATIONS

Width	Length	Colors
14"	26"	Yellow, Orange or White.

ORDER INFORMATION

Bags are available in bales of 1,000.
