

High-quality pine grading stake for use in construction and erosion control.

Used when installing silt fence, straw wattles and straw bales. Also used as reinforcing supports for concrete forms or as site survey markers.

PRODUCT SPECIFICATIONS

Available in a variety of sizes.

18 to 24-inch stakes are commonly used to secure straw wattle, depending on wattle diameter and local ordinances. 48-inch stakes are often used to secure straw bales and silt fencing.
